GOROOH SANATI ELECTROTECHNIC

WWW.GSE-MACHINERY.COM

**Attributes:**

- Reasonable and economical price
- Easy maintenance
- Control with PLC and touch screen controls (HMI)*
- Simple user interface and easy to operate
- Intelligent filling of products in accurate weights without manual intervention
- Ability to program for custom weights

* The electric panel control system in the normal type has a weighing controller and does not have a PLC, in which case the speed of the device decreases, and in the full type, it has a PLC and a comprehensive and accurate program, in which case the speed of the device increases.

SPECIFICATION	
Packing speed	5 to 50 Pack per min
Weighing range	50g – 50kg
Accuracy	±1 g – ±10 g
Product Contact Parts	Stainless steel 316
Product Contact Parts	In two types : stainless steel or iron with electrostatic paint
Working voltage	3P – 380 V AC (0.75 – 37 kw) or 1P – 220 V AC (0.75 – 5.5 kw)
Number of weighing nozzles	1 to 12 pieces depending on the customer's order
Mechanism	Electromechanics and Pneumatic
Vibrator mechanism	Magnetic or mechanical

*The mentioned information can be changed depending on the design and customer needs
