GOROOH SANATI ELCTROTECHNIC

WWW.GSE-MACHINERY.COM

Properties

- The platform and turntable of the machine are made of thick steel sheet
- High quality primary and secondary motor gearbox
- With PLC controller and HMI with easy user interface to apply settings
- With an encoder to adjust the height limit through
- Separate drive (VFD) for each motor
- High quality and durable conical roller bearing to prevent the linear displacement of the shaft due to the weight of the product, and a cylindrical roller bearing to maintain the position of the main shaft.
- The movement mechanism of the film holder in two types of chain and lead screw, chain: with high speed, for non-sensitive parts, lead screw: with low speed for sensitive parts.
- Has a horizontal holder to prevent light products from overturning (optional)

Weight capacity of the machine	750 – 3000 kg
Main engine power	1.5 – 3kw
Secondary engine power	0.75 kw
The working voltage of the device	3P – 380 V AC or 1P – 220 V AC
Turntable speed	1 – 12 RPM
The diameter of the turntable	80 – 150 cm
Maximum packaging height	200 cm
holder The maximum movement course of the stretch film	220 cm
